KEY RISKS

You should be aware that –

- The value of your investment, and the distribution payable, may go down as well as up.
- The return of the Fund is not guaranteed.

Equity Market Risk

The performance of the Fund is subject to the volatility of the stock market which is influenced by the changes in the economic and political climate, profit rate, international stock market performance and regulatory policies. The movement of the value in the underlying investment portfolio will affect the NAV of the Fund. Any downward movement of the value will negatively impact the NAV of the Fund.

Please refer to **Section 3.4** of the Prospectus for further information on product specific risks.

Stock Specific Risk

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the fund's NAV.

Please refer to **Section 3.4** of the Prospectus for further information on product specific risks.

Shariah Status Reclassification Risk

This risk refers to the risk that the currently held Shariah-compliant equities in the Fund may be reclassified as Shariah non-compliant in the periodic review of the equities by the SAC of the SC, the Shariah Adviser or the Shariah boards of the relevant Islamic indices. If this occurs, we will take the necessary steps to dispose such equities. There may be opportunity loss to the Fund due to the Fund not being allowed to retain the excess capital gains derived from the disposal of the Shariah non-compliant equities.

The designated fund manager will dispose of the equities within one month or such other period as maybe determined by the SAC of the SC if the prices are equal or above the cost of investment. Where the prices are below the cost of investment, the designated fund manager may hold on to the equities until the prices are equal to the cost of investment. If the designated fund manager decides to dispose of the equities below the cost of investment, the Fund will incur a realized loss that negatively impact the Fund's NAV.

Please refer to **Section 3.4** of the Prospectus for further information on product specific risks.

Warrant Risk	
<p>The Fund may hold Shariah-compliant warrants as a result of corporate actions of Shariah-compliant listed companies in which the Fund is holding their stocks. The value of warrants is influenced by the current market price of the underlying stocks, the exercise price of the warrant, the time to expiration of the warrant and the estimate of the future volatility of the underlying stock price over the life of the warrant. The warrant's price decreases as the warrant approaches its due date especially in the event that the warrants are held and not exercised.</p>	<p>Please refer to Section 3.4 of the Prospectus for further information on product specific risks.</p>
Liquidity Risk	
<p>Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavorable prices.</p>	<p>Please refer to Section 3.4 of the Prospectus for further information on product specific risks.</p>
Country Risk	
<p>Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the net asset value of the Fund or prices of units to fall.</p>	<p>Please refer to Section 3.4 of the Prospectus for further information on product specific risks.</p>
Currency Risk	
<p>As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.</p> <p>(a) Currency risk at the Fund's portfolio level</p> <p>The impact of the exchange rate movement between the base currency of the fund and the currency of the underlying investments may result in a depreciation of the value of the investments as expressed in the base currency of the fund; and</p> <p>(b) Currency risk at the class level</p> <p>The impact of the exchange rate movement between the base currency of the fund and the currency of the USD class may result in a depreciation of the investor's holdings as expressed in the base currency of the fund. The risk occurs when converting the NAV per unit in the base currency to the NAV per unit in the USD class denomination at a valuation point. Investors in MYR class are not exposed to the risk as no conversion of the NAV per unit is required.</p>	<p>Please refer to Section 3.4 of the Prospectus for further information on product specific risks.</p>

VALUATIONS AND EXITING FROM THIS INVESTMENT

HOW OFTEN ARE VALUATIONS AVAILABLE?

- The Fund will be valued at the close of Bursa Malaysia on every business day (“trading day” or “T” day). However, if the Fund holds any foreign investments, the valuation of assets of the Fund will be conducted after the close of a business day but not later than 5.00 p.m. of the following business day (T+1) due to the different time zones of foreign markets.
- For investment in the foreign assets, the value of the assets are translated on a daily basis to the Base Currency using the bid foreign exchange rate quoted by either Reuters or Bloomberg, at United Kingdom time 4.00 p.m. the same day. If the foreign markets the Fund is investing in are closed for business, the Manager will value the investment based on the latest available price as at the day the relevant foreign market was last open for business.
- You may obtain our latest information on the Fund’s price at our website, pmbinvestment.com.my.

Please refer to **Section 3.11** of the Prospectus for further information on determination of prices.
