- Islamic fixed income securities including sukuk, Islamic money market instruments, and Islamic deposit placements.

### 3.3 POLICY & INVESTMENT STRATEGY (CONTD.)

The equity market's performance over the first six months of the fund's financial period was dampened by heightened concerns over China's property crisis, growing pessimism over an economic recovery in the country, the Fed's hawkish pause, surging Treasury yields and dollar index, and a looming US government shutdown. Domestically, investors stayed cautious due to the state elections, lacklustre local results season, slower GDP growth and weak global market. In line with the market condition, the Fund Manager maintained the equities position around 47% to 55%. The Fund Manager was cautious about the equity market.

### 3.4 CROSS TRADE

No cross-trade transactions have been carried out during the 6 month financial period.

### 3.5 ASSET ALLOCATION OF THE FUND

Comparison of investment components based on NAV is as follows: -

ASSET ALLOCATION				
	31 Oct 2023 (%)	30 Apr 2023 (%)	Change (%)	Investment Exposure Average (%)
Shariah-compliant Equity	46.83	43.28	3.55	45.06
Islamic Real Estate Investment Trust (i-REIT)	4.19	4.47	(0.28)	4.33
Islamic Deposits/cash/ others	48.98	52.25	(3.27)	50.61

As at 31 October 2023, 46.83% of the Fund's NAV was invested in Shariah-compliant equity market and 4.19% in the i-REIT. The balance of 48.98% was held in Islamic deposits and/or other permitted investments.

### 3.6 EQUITY MARKET REVIEW

For the 6-month ended 31 October 2023, the main benchmark for the Malaysian Shariah-compliant equity, FBMSHA Index, appreciated by 104.80 points or 0.98% to 10,841.59 while the main benchmark for Malaysian stock market, FBMKLCI, increased by 26.19 points or 1.85% to 1,442.14.

### 3.6 EQUITY MARKET REVIEW (CONTD.)

During that period, the FBMSHA recorded its highest level of 11,018.46 on 20 September 2023 and its lowest of 10,414.87 on 30 June 2023. Meanwhile, FBMKLCI posted its highest level of 1,463.51 on 16 August 2023 while the lowest level of 1,374.64 was recorded on 8 June 2023. The movement range for the FBMSHA during the stipulated financial period was 603.59 points as compared to 2,194.56 points during the same period in the previous year.

In May, Bursa Malaysia remained on a downtrend due to persistent selling pressure in selected heavyweights, with the FBMKLCI index declining by 2.0% or 28.83 points MoM to close at 1,387.12. The external issues, namely the US debt-ceiling standoff and hawkish comments from Fed officials, kept stocks in a negative trend this month as investors await a signal the Fed's rate hiking cycle is at an end. Domestically, the lacklustre local 1Q 2023 results season and the upcoming six state elections were among the factors that kept investors taking a cautious approach. On economic fronts, Malaysia's GDP grew 5.6% in the 1Q 2023, driven higher by domestic demand and Bank Negara Malaysia (BNM) in a surprising move had raised the Overnight Policy Rate (OPR) by 25 basis points (bps) to 3%, the first hike since November 2022.

In June, the FBMKLCI fell by -0.8% MoM. FBMKLCI tumbled as much as 18.2 points before paring its losses to 11.7 points at 1,376.68 on the last day of the first half of 2023, taking a cue from the rebalancing exercises by funds before the crucial six states' polls likely to be held in August. Globally, the World Bank and OECD revised their global economic growth forecast to 2.1% (previously 1.7%) and 2.7% (previously 1.7%), respectively, for 2023. After the US House of Representatives and Senate passed the US debt-limit deal, President Joe Biden signed the deal into law, averting a US debt default. Locally, the government has reduced the stamp duty for shares traded on Bursa Malaysia, lowering it to 0.10% from 0.15% of the contract value, subject to a maximum cap of RM1,000 per contract, effective July 2023.

In July, the FBMKLCI rose by 6.0% or 82.75 points MoM to close at 1,459.43. Optimism that the Fed is at the tail-end of its rate-hike cycle, the prospect of more stimulus measures from Beijing to support China's growth, and foreign fund inflows helped push the market higher. Besides, the plantation and oil sectors gained after commodities such as Crude Palm Oil and Crude Oil prices rallied in the wake of Russia's attack on Ukraine's agricultural facilities and its ending of the Black Sea grain deal. Meanwhile, other global news includes a) the IMF projected global real GDP growth of 3.0% in 2023, up 0.2 percentage point from its April forecast, b) the FOMC raised the Fed funds rate by 25 basis points to 5.25%-5.50%, and c) Saudi extended its output reduction another month into August and Russia cut its exports by 500,000 barrels per day in August. Locally, the government a) gazetted the reduction of the stamp duty for shares traded on Bursa Malaysia to 0.10% from 0.15% of the contract value, subject to a maximum cap of RM1,000 per contract, effective 13 July 2023, b) launched the Madani Economic Narrative, c) launched the National Energy Transition Roadmap (NETR) Part 1, and d) BNM maintained its OPR at 3.0%.

### 3.6 EQUITY MARKET REVIEW (CONTD.)

In August, the FBMKLCI marginally shed 7.49 points, or 0.5%, MoM to close at 1,451.94 points. A strong surge of buying interest had been seen in the property names, utilities and construction sector. Other than that, investors stayed cautious due to the state elections, results season, slower 2Q 2023 GDP growth of 2.9%, and weak global market. Meanwhile, the global market performed poorly after a) Fitch Ratings downgraded its U.S. credit rating to AA+ from AAA, b) Moody's downgraded the credit ratings for ten smaller U.S. banks and put some bigger banks on watch for downgrade, c) S&P Global cut its credit ratings and outlook on multiple U.S. regional banks and d) China weakening economic activity.

In September, the FBMKLCI lost 27.77 points, or 1.9%, MoM, but gained 3.5% (+48.26 points) quarter-on-quarter (QoQ) to close at 1,424.17 points. The local market ended in negative territory as investors continued to fret about Fed's hawkish pause, surging Treasury yields and dollar index, and a looming US government shutdown. Sentiment was also dampened by heightened concerns over China's property crisis and growing pessimism over an economic recovery in the country. Locally, BNM maintained the OPR at 3.00% as widely expected and domestic investors reassessed the 12 Malaysian Plan (12MP) – Mid Term Review.

In October, the FBMKLCI gained 17.97 points, or 1.3%, MoM to close at 1,442.14 points. Sentiment dented by intensified fear over higher-for-longer US interest rate, the spike in US Treasury yield, GDP downgrade from the region and weakening Asia's manufacturing. Domestically, unencouraging economic development and foreign selling momentum added pressure on the local market. Despite the negative sentiment in the global market, FBMKLCI ended in positive territory due to buying support on the selected heavyweight counters. Prime Minister presented Budget 2024, themed "Economic Reforms, Empowering the People" in which the Malaysian economy is forecast to grow within the range of 4.0% to 5.0% next year (2023E: 4.0%). Meanwhile, the World Bank and IMF forecast Malaysia's real GDP to grow by 3.9% and 4.0% respectively in 2023. Both agencies expect Malaysia's GDP to grow 4.3% in 2024.

In this volatile market sentiment, the NAV/unit increased by 2.37% within a 6 month period ended 31 October 2023.

### 3.7 MONEY MARKET REVIEW

The Monetary Policy Committee (MPC) BNM decided to maintain the OPR at 3.00% during its last meeting held on 7 September 2023.

The global economy continues to expand, driven by resilient domestic demand supported by strong labour market conditions. Global growth, however, remains weighed down by persistently elevated core inflation and higher interest rates. Global trade is also affected by rotation of spending from goods to services, and the ongoing electrical and electronics (E&E) downcycle. The slower-than-expected growth in China also weighed on the global economy. Globally, headline inflation continued to moderate. While core inflation in advanced economies is slowing down, it remains above historical averages. For most central banks, the monetary policy stance is likely to remain tight.

### 3.7 MONEY MARKET REVIEW (CONTD.)

The growth outlook remains subject to downside risks, mainly from a slower momentum in major economies, higher-than-anticipated inflation outturns, an escalation of geopolitical tensions, and a sharp tightening in financial market conditions.

In the second quarter of the year, growth of the Malaysian economy was affected by slower external demand and a decline in commodity production. Moving forward, growth will continue to be driven by resilient domestic expenditure amid the challenging external environment. Continued employment and wage growth, particularly in the domestic-oriented sectors, remain supportive of household spending. Tourist arrivals and spending are expected to improve further. Investment activity would be supported by continued progress of multi-year infrastructure projects, and implementation of catalytic initiatives under the recently announced national master plans. Domestic financial conditions also remain conducive to financial intermediation amid sustained credit growth. These factors will continue to underpin the growth momentum going into 2024. While the growth outlook is subject to downside risks stemming from weaker-than-expected external demand and larger and protracted declines in commodity production, upside risks mainly emanate from stronger-than-expected tourism activity, a stronger recovery from the E&E downcycle, and faster implementation of existing and new projects.

Headline and core inflation have continued to ease amid the more moderate cost conditions. This moderating trend would likely continue in the second half of 2023, partly reflecting the higher base from the second half of 2022 and continued easing momentum of price increases. Risks to the inflation outlook remain highly subject to changes to domestic policy on subsidies and price controls, global commodity prices and financial market developments, as well as the degree of persistence in core inflation.

### 4.3 POLISI DAN STRATEGI PELABURAN (SAMB.)

### 4.6 SUASANA BURSA SAHAM

Bagi tempoh 6 bulan berakhir 31 Oktober 2023, penanda aras utama ekuiti patuh Syariah Malaysia iaitu Indeks FBMSHA meningkat sebanyak 104.80 mata atau 0.98% kepada 10,841.59 manakala penanda aras utama Bursa Malaysia iaitu FBMKLCI meningkat sebanyak 26.19 mata atau 1.85% kepada 1,442.14.

#### 4.6 SUASANA BURSA SAHAM (SAMB.)

Bagi tempoh tersebut, FBMSHA mencatat paras tertinggi 11,018.46 pada 20 September 2023 dan paras terendah 10,414.87 pada 30 Jun 2023. Sementara itu, FBMKLCI mencatat paras tertinggi 1,463.51 pada 16 Ogos 2023 manakala paras terendah pula ialah 1,374.64 yang dicatat pada 8 Jun 2023. Julat pergerakan Indeks FBM Shariah untuk tempoh tersebut ialah 603.59 mata berbanding 2,194.56 mata pada tempoh yang sama tahun sebelumnya.

Pada bulan Mei, Bursa Malaysia kekal dalam aliran menurun berikutan tekanan jualan berterusan ke atas saham berwajaran tinggi terpilih, dengan indeks FBMKLCI merosot sebanyak 2.0% atau 28.83 mata MoM untuk ditutup pada 1,387.12. Isu luaran, iaitu kebuntuan hutang AS dan komen "hawkish" daripada pegawai Fed, menyebabkan pasaran dalam arah aliran negatif bulan ini, disamping pelabur menunggu isyarat berakhirnya kitaran kenaikan kadar faedah AS. Di peringkat domestik, keputusan korporat bagi S1 2023 yang tidak memberangsangkan dan pilihan raya negeri di enam negeri yang bakal diadakan adalah antara faktor yang membuatkan pelabur mengambil pendekatan berhati-hati. Dari segi ekonomi, KDNK Malaysia berkembang 5.6% pada S1 2023, didorong oleh permintaan dalam negara dan BNM mengejutkan pasaran dengan menaikkan OPR sebanyak 25 mata asas (bps) kepada 3%, kenaikan pertama sejak November 2022.

Pada bulan Jun, FBMKLCI jatuh sebanyak -0.8% MoM. FBMKLCI menjunam sebanyak 18.2 mata sebelum mengurangkan kerugiannya kepada 11.7 mata pada 1,376.68 pada hari terakhir separuh pertama tahun 2023, ekoran aktiviti pelarasan oleh dana-dana sebelum pilihanraya negeri bagi enam negeri yang mungkin diadakan pada Ogos. Di peringkat global, Bank Dunia dan OECD menyemak semula unjuran pertumbuhan ekonomi global mereka masing-masing kepada 2.1% (sebelum ini 1.7%) dan 2.7% (sebelum ini 1.7%), untuk 2023. Selepas Dewan Perwakilan AS dan Senat meluluskan perjanjian had hutang AS, Presiden Joe Biden menandatangani perjanjian itu menjadi undang-undang, mengelakkan kemungkiran hutang AS. Di peringkat tempatan, kerajaan telah mengurangkan duti setem bagi saham yang didagangkan di Bursa Malaysia, menurunkannya kepada 0.10% daripada 0.15% daripada nilai kontrak, tertakluk kepada had maksimum RM1,000 setiap kontrak, berkuat kuasa Julai 2023.

Pada Julai, FBMKLCI meningkat sebanyak 6.0% atau 82.75 mata MoM untuk ditutup pada 1,459.43. Keyakinan bahawa Fed berada di penghujung kitaran kenaikan kadarnya, prospek lebih banyak langkah rangsangan daripada Beijing untuk menyokong pertumbuhan China, dan aliran masuk dana asing membantu mendorong pasaran lebih tinggi. Selain itu, sektor perladangan dan minyak meningkat selepas harga komoditi seperti Minyak Sawit Mentah dan Minyak Mentah meningkat susulan serangan Rusia ke atas kemudahan pertanian Ukraine dan penamatan perjanjian bijirin Laut Hitam. Sementara itu, berita global lain termasuk a) IMF mengunjurkan pertumbuhan KDNK global sebanyak 3.0% pada 2023, naik 0.2 peratusan mata daripada unjuran April, b) FOMC menaikkan kadar Dana sebanyak 25 mata asas kepada 5.25% - 5.50%, dan c) Saudi melanjutkan pengurangan pengeluarannya sebulan lagi ke bulan Ogos dan Rusia mengurangkan eksportnya sebanyak 500,000 tong sehari pada bulan Ogos.

#### 4.6 SUASANA BURSA SAHAM (SAMB.)

Di dalam negara pula, kerajaan a) mewartakan pengurangan duti setem bagi saham yang didagangkan di Bursa Malaysia kepada 0.10% daripada 0.15% daripada nilai kontrak, tertakluk kepada had maksimum RM1,000 setiap kontrak, berkuat kuasa 13 Julai 2023, b) melancarkan Naratif Ekonomi Madani, c) melancarkan Pelan Hala Tuju Peralihan Tenaga Nasional (NETR) Bahagian 1, dan d) BNM mengekalkan OPR pada 3.0%.

Pada Ogos, FBMKLCI susut sedikit sebanyak 7.49 mata, atau 0.5%, MoM untuk ditutup pada 1,451.94 mata. Lonjakan minat belian dilihat dalam sektor hartanah, utiliti dan pembinaan. Selain itu, pelabur kekal berhati-hati berikutan pilihan raya negeri, musim keputusan korporat, pertumbuhan KDNK S2 2023 yang lebih perlahan iaitu 2.9%, dan pasaran global yang lemah. Pasaran global menunjukkan prestasi yang tidak memberangsangkan selepas a) Fitch Ratings menurunkan penarafan kredit A.S. kepada AA+ daripada AAA, b) Moody's menurunkan penarafan kredit untuk sepuluh bank kecil A.S. dan meletakkan beberapa bank yang lebih besar dalam pengawasan untuk menurunkan tarafnya, c) S&P Global memotong penarafan kredit dan tinjauan ke atas beberapa bank di A.S. dan d) aktiviti ekonomi China yang lemah.

Pada September, FBMKLCI susut sebanyak 27.77 mata, atau 1.9%, MoM, tetapi menokok sebanyak 3.5% (+48.26 mata) suku-ke-suku (QoQ) untuk ditutup pada 1,424.17 mata. Pasaran tempatan berakhir dalam wilayah negatif apabila pelabur terus bimbang tentang pandangan hawkish Fed, peningkatan hasil Perbendaharaan dan indeks dolar, dan penutupan kerajaan AS yang semakin hampir. Sentimen juga dilemahkan oleh kebimbangan yang memuncak terhadap krisis hartanah China dan pesimisme yang semakin meningkat terhadap pemulihan ekonomi di negara itu. Di peringkat tempatan, BNM mengekalkan OPR pada 3.00% seperti yang dijangkakan dan pelabur domestik menilai semula Kajian Separuh Penggal Rancangan Malaysia Ke-12 (RMK-12).

Pada Oktober, FBMKLCI menokok 17.97 mata, atau 1.3%, MoM untuk ditutup pada 1,442.14 mata. Sentimen terjejas oleh kebimbangan yang semakin meningkat terhadap kadar faedah AS yang lebih tinggi untuk tempoh yang lebih lama, lonjakan hasil Perbendaharaan AS, penurunan KDNK rantau ini dan sektor pembuatan Asia yang melemah. Di peringkat domestik, perkembangan ekonomi yang kurang menggalakkan dan momentum jualan asing menambah tekanan ke atas pasaran tempatan. Walaupun sentimen negatif dalam pasaran global, FBMKLCI berakhir di wilayah positif berikutan sokongan belian di kaunter wajaran tinggi terpilih. Perdana Menteri membentangkan Bajet 2024, bertemakan "Pembaharuan Ekonomi, Memperkasa Rakyat" di mana ekonomi Malaysia diramal berkembang dalam lingkungan 4.0% hingga 5.0% tahun depan (2023E: 4.0%). Sementara itu, Bank Dunia dan IMF meramalkan KDNK benar Malaysia masing-masing berkembang sebanyak 3.9% dan 4.0% pada 2023. Kedua-dua agensi menjangkakan KDNK Malaysia tumbuh 4.3% pada 2024.

Dalam keadaan pasaran yang tidak menentu ini, nilai NAB/unit Dana meningkat sebanyak 2.37% bagi tempoh 6-bulan kewangan berakhir 31 Oktober 2023.

#### 4.7 SUASANA PASARAN WANG TEMPATAN

Jawatankuasa Dasar Monetari (MPC) BNM memutuskan untuk mengekalkan OPR pada 3.00% dalam mesyuarat yang bersidang pada 7 September 2023.

#### 4.7 SUASANA PASARAN WANG TEMPATAN (SAMB.)

Ekonomi global terus berkembang, didorong oleh keadaan permintaan dalam negeri yang berdaya tahan dengan sokongan keadaan pasaran pekerja yang teguh. Walau bagaimanapun, pertumbuhan global terus terjejas disebabkan oleh inflasi teras yang kekal tinggi dan kadar faedah yang lebih tinggi. Perdagangan global juga terjejas disebabkan oleh peralihan perbelanjaan (rotation of spending) daripada barangan kepada perkhidmatan serta permintaan yang terus berkurang dalam sektor elektrik dan elektronik (electrical and electronics, E&E). Pertumbuhan di China yang lebih perlahan daripada jangkaan turut menjejaskan ekonomi global. Pada peringkat global, inflasi keseluruhan terus menurun. Meskipun inflasi teras semakin perlahan di ekonomi maju, inflasi tersebut masih melebihi purata jangka panjang. Pendirian dasar monetari bagi kebanyakan bank pusat dijangka kekal ketat. Prospek pertumbuhan terus bergantung pada risiko pertumbuhan menjadi lebih perlahan, terutamanya disebabkan oleh momentum ekonomi negara maju yang lebih perlahan, inflasi sebenar yang lebih tinggi daripada jangkaan, ketegangan geopolitik yang semakin meruncing dan keadaan pasaran kewangan yang menjadi ketat secara mendadak.

Pada suku kedua tahun 2023, pertumbuhan ekonomi Malaysia telah terkesan akibat permintaan luaran yang lebih perlahan dan pengeluaran komoditi yang menurun. Pada masa hadapan, pertumbuhan akan terus didorong oleh perbelanjaan dalam negeri yang berdaya tahan dalam keadaan persekitaran luaran yang mencabar. Pertumbuhan guna tenaga dan upah yang berterusan, khususnya dalam sektor berorientasikan dalam negeri, terus menyokong perbelanjaan isi rumah. Ketibaan dan perbelanjaan pelancong dijangka terus meningkat. Aktiviti pelaburan akan disokong oleh projek infrastruktur berbilang tahun yang terus dilaksanakan serta pelaksanaan inisiatif pemangkin di bawah beberapa pelan induk nasional yang diumumkan baru-baru ini. Keadaan kewangan domestik juga terus kondusif untuk pengantaraan kewangan berikutan pertumbuhan kredit yang berterusan. Faktor-faktor ini akan terus menyokong momentum pertumbuhan menjelang tahun 2024. Meskipun prospek pertumbuhan bergantung pada risiko pertumbuhan menjadi perlahan yang berpunca daripada permintaan luaran yang lebih lemah daripada jangkaan dan penurunan pengeluaran komoditi yang lebih besar dan berpanjangan. Namun, kemungkinan pertumbuhan menjadi lebih tinggi berpunca terutamanya daripada aktiviti pelancongan yang lebih kukuh daripada jangkaan, permintaan E&E yang pulih dengan lebih teguh serta pelaksanaan projek sedia ada dan projek baharu yang lebih pantas.

Inflasi keseluruhan dan inflasi teras terus mereda berikutan keadaan kos yang lebih sederhana. Trend menurun ini dijangka berterusan pada separuh kedua tahun 2023, mencerminkan sebahagiannya asas yang lebih tinggi daripada separuh kedua tahun 2022 dan momentum kenaikan harga yang terus reda. Risiko terhadap prospek inflasi terus sangat dipengaruhi oleh perubahan dasar dalam negeri mengenai subsidi dan kawalan harga, perkembangan harga komoditi global dan pasaran kewangan, serta inflasi teras yang berlarutan.

#### 4.8 KEPENTINGAN PEMEGANG-PEMEGANG UNIT

Sepanjang tempoh kajian berakhir 31 Oktober 2023, tiada sebarang kejadian yang menjejaskan kepentingan Pemegang-Pemegang Unit selain daripada urusan-ususniaga yang dijalankan selaras dengan Surat Ikatan Amanah, Garis panduan Tabung Unit Amanah, Akta Pasaran Modal dan Perkhidmatan 2007 dan undang-undang lain yang berkuatkuasa.

#### 4.9 REBAT DAN KOMISEN RINGAN

Sepanjang tempoh 6 bulan kewangan berakhir 31 Oktober 2023, Pengurus Dana menerima perkhidmatan daripada salah sebuah institusi broker saham yang membantu proses membuat keputusan berkaitan pelaburan Dana secara tidak langsung. Perkhidmatan yang diterima adalah dalam bentuk khidmat nasihat berkaitan hal-hal Syariah. ## NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023

### 1. THE FUND, THE MANAGER AND PRINCIPAL ACTIVITY

PMB-An-Nur Waqf Income Fund (“the Fund”) was constituted pursuant to the execution of a Master Deed dated 9 March 2021 (“the Deed”) as amended by the first supplemental deed dated 25 October 2022 entered into between the Manager, PMB Investment Berhad and the Trustee, CIMB Islamic Trustee Berhad had been registered with the Securities Commission Malaysia. The Fund commenced operations was on 8 April 2021.

The main activity of PMB-An-Nur Waqf Income Fund is to invest in marketable securities transactions in which the investments are made in the “Permitted Investments” as defined in the Deeds and subject to approval by the Securities Commission Malaysia and in accordance with Shariah requirements. This includes securities listed on Bursa Malaysia and in money market instruments approved by the Shariah principles and to enable the Unit Holders to channel all or part of the distribution for waqf purposes.

The Fund will continue to operate until it is terminated or dissolved in accordance with the provision of the Master Deed and the Capital Markets and Services Act, 2007.

The Manager is a company incorporated in Malaysia and wholly owned by Pelaburan MARA Berhad. The principal activity of the Manager is the management of Unit Trust Funds and Corporate Funds.

### 2. OBJECTIVES AND POLICIES OF FINANCIAL RISK MANAGEMENT

This Unit Trust Fund operations are exposed to several risks including equity market risk, stock specific risk, equity-related securities risk, Shariah status reclassification risk, dividend policy risk, profit rate risk, credit risk and liquidity risk. Financial risk management is carried out through the system of internal control and investment restrictions outlined in the Guidelines on Unit Trust Funds by the Securities Commission Malaysia and based on Shariah principles.

#### (a) Equity Market Risk

The performance of the Fund is subject to the volatility of the stock market which is influenced by the changes in the economic and political climate, interest rate, international stock market performance and regulatory policies. The movement of the value in the underlying investment portfolio will affect the Net Asset Value (“NAV”) of the Fund. Any downward movement of the value will negatively impact the NAV of the Fund.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023**

**2. OBJECTIVES AND POLICIES OF FINANCIAL RISK MANAGEMENT (CONTD.)**

**(a) Equity Market Risk (Contd.)**

The table below shows the impact on NAV of the Fund at the reporting date due to the possible change in equity price with all other variables held constant:

<b>Quoted Shariah-compliant shares in Malaysia</b> RM	<b>Changes in equity price</b> RM	<b>Impact on distributed net asset value</b> RM
3,971,204	+5 / -5	198,560 / (198,560)

**(b) Stock Specific Risk**

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.

**(c) Equity-related Securities Risk**

The value of the Shariah-compliant equity-related securities depends on the value of the underlying equities that the Shariah-compliant securities are related to. Any upward movement in the value of the underlying Shariah-compliant equities may result an upward movement of the value of the respective Shariah-compliant equity-related securities, and vice versa. Hence, the movement of the value of the Shariah-compliant equity-related securities will affect the value of the Fund. The Fund may also invest in Shariah-compliant equity-related securities such as Shariah-compliant warrants, that have an expiry date and may experience time decay and the erosion of value accelerates as the instrument advances to its expiry date. If the Shariah-compliant warrant is not exercised on or before the expiry date, the Shariah-compliant warrant will have no value and negatively impact the NAV of the Fund.

**(d) Shariah Status Reclassification Risk**

**(a) Shariah-compliant equity securities**

This risk refers to the risk that the currently held Shariah-compliant equity securities in the portfolio of the Fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council ("SAC") of the Securities Commission Malaysia ("SC"), the Shariah Adviser or the Shariah Supervisory Boards of relevant Islamic indices. If this occurs, the Manager will take the necessary steps to dispose of such securities.

Opportunity loss could occur due to the restriction on the Fund to retain the excess capital gains derived from the disposal of the reclassified Shariah non-compliant securities. In such an event, the Fund is required:

## NOTES TO THE FINANCIAL STATEMENTS

### FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023

#### 2. OBJECTIVES AND POLICIES OF FINANCIAL RISK MANAGEMENT (CONTD.)

##### (d) Shariah Status Reclassification Risk (Contd.)

###### (a) Shariah-compliant equity securities (Contd.)

- (i) to dispose of such securities with immediate effect or within one (1) calendar month if the value of the securities exceeds or is equal to the investment cost on the effective date of reclassification of the list of Shariah-compliant securities ("Reclassification") by the SAC of the SC or date of review ("Review") by the Shariah Adviser or the Shariah Supervisory Boards of relevant Islamic indices. The Fund is allowed to keep dividends received and capital gains from the disposal of the securities up to the effective date of Reclassification or Review. However, any dividends received and excess capital gains from the disposal of the Shariah non-compliant securities after the effective date of Reclassification or Review should be channelled to *baitulmal* and/or charitable bodies as advised by the Shariah Adviser;
- (ii) to hold such securities if the value of the said securities is below the investment cost on the effective date of Reclassification or Review until the total subsequent dividends received (if any) and the market price of the securities is equal to the cost of investment at which time disposal has to take place within one (1) calendar month, excess capital gains (if any) from the disposal of the securities should be channelled to *baitulmal* and/or charitable bodies as advised by the Shariah Adviser; or
- (iii) to dispose of such securities at a price lower than the investment cost which will result in a decrease in the Fund's value.

###### (b) Islamic fixed income instruments or Islamic money market instruments or Islamic deposits.

The risk refers to the risk of a possibility that the currently held Islamic fixed income instruments or Islamic money market instruments or Islamic deposits invested by the Fund may be declared as Shariah non-compliant by the relevant authority or the Shariah Adviser. If this occurs, the Manager will take the necessary steps to dispose of or withdraw such fixed income instruments or money market instruments or deposits.

###### (e) Dividend Policy Risk

Dividend policy risk is the risk that the Fund will have heavy emphasis on high yield dividend stock. Such a risk may occur when fundamentals of the company's business deteriorate or if there is a change in the dividend payout policy resulting in a reduction of the dividend to be paid by the company.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023**

**2. OBJECTIVES AND POLICIES OF FINANCIAL RISK MANAGEMENT (CONTD.)**

**(e) Dividend Policy Risk (Contd.)**

This risk may be mitigated by investing mainly in companies with a consistent historical record of paying dividends, strong cash flow, or operating in fairly stable industries.

**(f) Profit Rate Risk**

Movements in profit rates will have an impact on the management of a Fund. This risk refers to the effect of profit rate changes on the market value of Islamic money market instruments, Islamic deposit placements and sukuk. Any downward movement of the profit rate may result in a loss of the expected return from the Fund's investments in Islamic money market instrument and Islamic deposit placement. The value of the sukuk has a tendency to move inversely with the movement of the profit whereby the prices of the sukuk may fall when profit rates rise, and vice versa.

The interest rate is a general indicator. Although the Fund does not invest in interest bearing instruments, the movement of the profit rate will have an impact on the profit rate of the Islamic money market instruments and Islamic deposit placement, and consequently affect the expected return of the Fund's investments.

The table below shows the sensitivity of changes in the rate of profit at the reporting date assuming all other variables held constant.

	<b>Profit from Islamic deposits</b>	<b>Change in basis points</b>	<b>Effect on Islamic profit Increase/ (Decrease)</b>
	<b>RM</b>	<b>RM</b>	<b>RM</b>
<b>31.10.2023</b>	57,019	+50 / -50	28,510/(28,510)
<b>30.04.2023</b>	105,696	+50 / -50	19,650/(19,650)

**(g) Credit Risk**

Credit risk relates to the creditworthiness of the issuers of the sukuk and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the sukuk. In the case of rated sukuk, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a sukuk either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the sukuk. This could adversely affect the value of the Fund.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023**

**2. OBJECTIVES AND POLICIES OF FINANCIAL RISK MANAGEMENT (CONTD.)**

**(h) Liquidity Risk**

Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavorable prices.

The Fund maintains sufficient level of Islamic liquid assets, after consultation with the Trustee, to meet anticipated payments and cancellations of units by the unit holders. Islamic liquid assets comprise cash, Islamic deposits with licensed financial institutions and other Shariah-compliant instruments which are capable of being converted into cash within 7 days.

The table below summarises the Fund's financial liabilities into relevant maturity grouping based on the remaining period as at the statement of financial position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows.

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

#### (I) Financial Instruments

##### (i) Recognition and Initial Measurement

A financial asset or a financial liability is recognised in the statement of financial position when, and only when, the Fund becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without significant financing component) or a financial liability is initially measured at fair value plus or minus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issuance. A trade receivable without a significant financing component is initially measured at the transaction price.

An embedded derivative is recognised separately from the host contract where the host contract is not a financial asset, and accounted for separately if, and only if, the derivative is not closely related to the economic characteristics and risks of the host contract and the host contract is not measured at fair value through profit or loss. The host contract, in the event an embedded derivative is recognised separately, is accounted for in accordance with policy applicable to the nature of the host contract.

##### (ii) Financial instrument categories and subsequent measurement

#### **Financial assets**

Categories of financial assets are determined on initial recognition and are not reclassified subsequent to their initial recognition unless the Fund changes its business model for managing financial assets in which case all affected financial assets are reclassified on the first day of the first reporting period following the change of the business model.

#### **(a) Amortised cost (AC)**

Amortised cost category comprises financial assets that are held within a business model whose objective is to hold assets to collect contractual cash flows and its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The financial assets are not designated as fair value through profit or loss. Subsequent to initial recognition, these financial assets are measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Profit income is recognised by applying effective profit rate to the gross carrying amount except for credit impaired financial assets where the effective profit rate is applied to the amortised cost.

**(I) Financial Instruments (Contd.)**

- (ii) Financial instrument categories and subsequent measurement (Contd.)

***Financial assets (Contd.)***

**(b) Fair value through other comprehensive income (FVOCI)**

**(i) Debt investments**

Fair value through other comprehensive income category comprises debt investment where it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the debt investment, and its contractual terms give rise on specified dates to cash flows that are solely payments of principal and profit on the principal amount outstanding. The debt investment is not designated as at fair value through profit or loss. Profit income calculated using the effective profit method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in other comprehensive income.

On derecognition, gains and losses accumulated in other comprehensive income are reclassified to profit or loss.

Profit income is recognised by applying effective profit rate to the gross carrying amount except for credit impaired financial assets where the effective profit rate is applied to the amortised cost.

**(ii) Equity investments**

This category comprises investment in equity that is not held for trading, and the Fund irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income. This election is made on an investment-by investment basis. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of investment.

Other net gains and losses are recognised in other comprehensive income. On derecognition, gains and losses accumulated in other comprehensive income are not reclassified to profit or loss.

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)**

**(I) Financial Instruments (Contd.)**

- (ii) Financial instrument categories and subsequent measurement (Contd.)

***Financial assets (Contd.)***

**(c) Fair value through profit or loss (FVPL)**

All financial assets not measured at amortised cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss. This includes derivative financial assets (except for a derivative that is a designated and effective hedging instrument). On initial recognition, the Fund may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at fair value through other comprehensive income as at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets categorised as fair value through profit or loss are subsequently measured at their fair value. Net gains or losses, including any interest or dividend income, are recognised in the profit or loss.

All financial assets, except for those measured at fair value through profit or loss and equity investments measured at fair value through other comprehensive income, are subject to impairment assessment.

***Financial liabilities***

The categories of financial liabilities at initial recognition are as follows:

**(a) Amortised cost (AC)**

Other financial liabilities not categorised as fair value through profit or loss are subsequently measured at amortised cost using the effective profit method.

Profit expense and foreign exchange gains and losses are recognised in the profit or loss. Any gains or losses on derecognition are also recognised in the profit or loss.

**(b) Provisions**

Provision is recognised only when the Fund has a present obligation (legal and constructive) as a result of a past event, it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be estimated reliably.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023**

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)**

**(l) Financial Instruments (Contd.)**

- (ii) Financial instrument categories and subsequent measurement (Contd.)

***Financial liabilities (Contd.)***

**(b) Provisions (Contd.)**

Provision are reviewed at each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provision is reversed. If the effect of the time value of money is material, provisions are discounted using a current pre tax rate that reflects, where appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

(iii) Derecognition

A financial asset or part of it is derecognised when, and only when, the contractual rights to the cash flows from the financial asset expire or transferred, or control of the asset is not retained or substantially all of the risks and rewards of ownership of the financial asset are transferred to another party. On derecognition of a financial asset, the difference between the carrying amount of the financial asset and the sum of consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss.

A financial liability or a part of it is derecognised when, and only when, the obligation specified in the contract is discharged, cancelled or expired. A financial liability is also derecognised when its terms are modified and the cash flows of the modified liability are substantially different, in which case, a new financial liability based on modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount of the financial liability extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

(iv) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Fund currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and liability simultaneously.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023**

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)**

**(l) Financial Instruments (Contd.)**

**(v) Unitholders' Contribution**

The Unitholders' contributions to the Fund meet the definition of puttable instruments classified as equity under the MFRS 9.

Instruments classified as equity are measured at cost and are not remeasured subsequently.

Distribution equalisation is accounted for at the date of creation and cancellation of units of the Fund. It represents the average amount of distributable income or loss included in the creation and cancellation prices of units.

**(m) Impairment of Assets**

**(i) Financial assets**

The Fund recognised loss allowances for expected credit losses on financial assets measured at amortised cost, debt investments measured at fair value through other comprehensive income, contract assets and lease receivables. Expected credit losses are a probability-weighted estimate of credit losses.

The Fund measures loss allowances at an amount equal to lifetime expected credit loss, except for debt securities that are determined to have low credit risk at the reporting date, cash and bank balance and other debt securities for which credit risk has not increased significantly since initial recognition, which are measured at 12-month expected credit loss. Loss allowances for trade receivables, contract assets and lease receivables are always measured at an amount equal to lifetime expected credit loss.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit loss, the Fund consider reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Fund's historical experience and informed credit assessment and including forward-looking information, where available.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of the asset, while 12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within the 12 months after the reporting date.

The maximum period considered when estimating expected credit losses is the maximum contractual period over which the Fund are exposed to credit risk.

**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023**

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)**

**(m) Impairment of Assets (Contd.)**

**(i) Financial assets (Contd.)**

The Fund estimates the expected credit losses on trade receivables using a provision matrix with reference to historical credit loss experience.

An impairment loss in respect of financial assets measured at amortised cost is recognised in profit or loss and the carrying amount of the asset is reduced through the use of an allowance account.

An impairment loss in respect of debt investments measured at fair value through other comprehensive income is recognised in profit or loss and the allowance account is recognised in other comprehensive income.

At each reporting date, the Fund assesses whether financial assets carried at amortised cost and debt securities at fair value through other comprehensive income are credit impaired. A financial asset is credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

The gross carrying amount of a financial asset is written off (either partially or fully) to the extent that there is no realistic prospect of recovery. This is generally the case when the Fund determines that the obligor does not have assets or sources of income that could generate sufficient cash flows to pay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Fund's procedures for recovery amounts due.

**(ii) Other assets**

The carrying amounts of other assets (except for inventories, contract assets, lease receivables, deferred tax asset, assets arising from employee benefits, investment property measured at fair value and non-current assets (or disposal groups) classified as held for sale) are reviewed at the end of each reporting period to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For goodwill and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated each period at the same time.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

#### (m) Impairment of Assets (Contd.)

##### (ii) Other assets (Contd.)

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash-generating units. Subject to an operating segment ceiling test, for the purpose of goodwill impairment testing, cash-generating units to which goodwill has been allocated are aggregated so that the level at which impairment testing is performed reflects the lowest level at which goodwill is monitored for internal reporting purposes.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or cash-generating unit.

An impairment loss is recognised if the carrying amount of an asset or its related cash-generating unit exceeds its estimated recoverable amount.

Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit (group of cash-generating units) and then to reduce the carrying amounts of the other assets in the cash-generating unit (groups of cash-generating units) on a *pro rata* basis. An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at the end of each reporting period for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognised. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. Reversals of impairment losses are credited to profit or loss in the financial year in which the reversals are recognised.

#### (n) Fair Value of financial instruments

Financial instruments comprise financial assets and financial liabilities. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. exit price).

## NOTES TO THE FINANCIAL STATEMENTS FOR THE 6 MONTHS FINANCIAL PERIOD ENDED 31 OCTOBER 2023

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTD.)

#### (n) Fair Value of financial instruments (Contd.)

The fair value of financial assets traded in active markets (such as trading Shariah-compliant securities) are based on quoted market prices at the close of trading on the financial year end date.

An active market is a market in which transactions for the assets and liabilities take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

The fair value of financial assets that are not traded in an active market is determined by using valuation techniques.

The carrying values of cash and cash equivalents, amount owing by stockbroking, profit receivable from Islamic deposits, dividend receivable and all current liabilities are reasonable approximations of their fair values due to their short-term nature.

The Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active market for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset and liability that are not based on observable market data (that is, unobservable inputs) (Level 3)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Fund. The Fund considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.
