Investment Strategy

The Fund shall invest primarily in a diversified portfolio of Shariah-compliant equities and Shariah-compliant equity-related securities listed on any recognised stock exchange in Malaysia.

The portfolio construction process will be research-driven with extensive bottom-up fundamental analysis coupled with top down economic and sector analysis. In identifying investable Shariah-compliant equities, the designated fund manager will rely on fundamental research, taking into consideration the companies' financial strengths (including track records), prospects, business operations and governance. In addition, prospects for the economies and sectors in which the companies operate will also be assessed.

The focus will be on Shariah-compliant equities of public-listed companies with growth prospects over medium to long term horizon and/or having forecast dividend yield of 3.0% per annum or above, to optimise the total returns of the Fund. Other valuation measures may include Price-to-Earnings (PE), PE-to-Growth, Discounted Cash Flow, Price-to Revalued Net Asset Value or Price-to-Book depending on the sector the companies operate and whether the operations are perpetual or for a defined period. Analysis will also consider revenue growth, profit margins, sustainability of earnings, balance sheet and cash flow. In view of its investment objective, the designated fund

manager will adopt an active investment management approach and frequency of trading of securities will very much depend on market conditions.

Under normal circumstances, allocation to Shariah-compliant equity and Shariah-compliant equity-related securities ranges between 70% and 99.5% of the NAV of the Fund. The remaining will be invested in Islamic money market instruments, Islamic deposits placement, sukuk and/or other Shariah-compliant permitted investments. The equity allocation may be reviewed from time to time depending on the global, regional and local economic as well as equity market conditions. This includes assessing the relevant political, economic and business environment prior to making investment decisions.

Please refer to **Section 3** of the Master Prospectus for further information on investment strategy.

KEY RISKS

You should be aware that –

- The value of your investment, and the distribution payable, may go down as well as up.
- The return of the Fund is not guaranteed.

Equity Market Risk

The performance of the Fund is subject to the volatility of the stock market which is influenced by the changes in the economic and political climate, interest rate, international stock market performance and regulatory policies. The movement of the value in the underlying investment portfolio will affect the NAV of the Fund. Any downward movement of the value will negatively impact the NAV of the Fund.

Stock Specific Risk

Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.

Equity-related Securities Risk

The value of the Shariah-compliant equity-related securities depends on the value of the underlying equities that the Shariah-compliant securities are related to. Any upward movement in the value of the underlying Shariah-compliant equities may result an upward movement of the value of the respective Shariah-compliant equity-related securities, and vice versa. Hence, the movement of the value of the Shariah-compliant equity-related securities will affect the value of the Fund.

The fund may also invest in Shariah-compliant equity-related securities such as Shariah-compliant warrants, that have an expiry date and may experience time decay, and the erosion of value accelerates as the instrument advances to its expiry date. If the Shariah-compliant warrant is not exercised on or before the expiry date, the Shariah-compliant warrant will have no value and negatively impact the NAV of the Fund.

Shariah Status Reclassification Risk

(a) Shariah-compliant equity securities

This risk refers to the risk that the currently held Shariah-compliant equity securities in the portfolio of the Fund may be reclassified as Shariah noncompliant in the periodic review of the securities by the SAC of the SC, the Shariah Adviser or the Shariah Supervisory Boards of relevant Islamic indices. If this occurs, the Manager will take the necessary steps to dispose of such securities.

Opportunity loss could occur due to the restriction on the Fund to retain the excess capital gains derived from the disposal of the reclassified Shariah non-compliant securities. In such an event, the Fund is required:

- to dispose of such securities with immediate effect or within one (1) calendar month if the value of the securities exceeds or is equal to the investment cost on the effective date of reclassification of the list of Shariah-compliant securities ("Reclassification") by the SAC of the SC or date of review ("Review") by the Shariah Adviser or the Shariah Supervisory Boards of relevant Islamic indices. The Fund is allowed to keep dividends received and capital gains from the disposal of the securities up to the effective date of Reclassification or Review. However, any dividends received and excess capital gains from the disposal of the Shariah non-compliant securities after the effective date of Reclassification or Review should be channelled to baitulmal and/or charitable bodies as advised by the Shariah Adviser;

- ii) to hold such securities if the value of the said securities is below the investment cost on the effective date of Reclassification or Review until the total subsequent dividends received (if any) and the market price of the securities is equal to the cost of investment at which time disposal has to take place within one (1) calendar month, excess capital gains (if any) from the disposal of the securities should be channelled to baitulmal and/or charitable bodies as advised by the Shariah Adviser; or
- iii) to dispose of such securities at a price lower than the investment cost which will result in a decrease in the Fund's value.

- (b) Islamic fixed income instruments or Islamic money market instruments or Islamic deposits or Islamic collective investment schemes

This risk refers to the risk of a possibility that the currently held Islamic fixed income instrument or Islamic money market instruments or Islamic deposits or Islamic collective investment schemes invested by the Fund may be declared as Shariah non-compliant by the relevant authority or the Shariah Adviser. If this occurs, the Manager will take the necessary steps to dispose of or withdraw such fixed income instrument or money market instruments or deposits or collective investment schemes.

Dividend Policy Risk

This is a risk particular to the Fund which has heavy emphasis on high yield dividend stocks. Such a risk may occur when fundamentals of the company's business deteriorate or if there is a change in the dividend payout policy resulting in a reduction of the dividend to be paid by the company. This risk may be mitigated by investing mainly in companies with a consistent historical record of paying dividends, strong cash flow, or operating in fairly stable industries.

Please refer to [Section 3.5](#) of the Master Prospectus and its Second Supplementary Master Prospectus for further information on product specific risks.

- You may redeem your investment wholly or partially. There is no minimum number of units for redemption but you must meet the minimum holding of units after a repurchase transaction.
